

Weary Heart

Writer: Unknown

Weary heart He hears your cry and He's standing close by
For every deed that you have done He knows just now
Your every pain is His pain too
And He will never fail you
Weary heart just know that He will see you through

Chorus:

Now don't look back nor to the side
Look straight ahead what e'er be tide
Though there's lonely moments, yes
He knows that's true
But consider all the miles that He traveled with no smile
Weary heart just know that He will see you through

Never falter, never fail
Once your ship has set its sail
There's a harbor 'waiting you across the tide
And though the storms come rough and long
Remember you are not alone
Weary heart lift up your eyes; don't question why

Repeat Chorus

Weary heart just know that He will see you through
